

Car Finance Worksheet

Use this car finance worksheet to write down the numbers you get from using a car payment calculator, so you can compare different terms, down payment amounts and more side by side. Count any rebates that lower the car price as part of your down payment. Use Kelley Blue Book or another industry guide to find the [value of your trade-in](#).

Not sure how much taxes, title and fees will be? A rule of thumb is to estimate that all taxes and fees will add up to be about 10% of the purchase price.
